Education

LaSalle College: Computer Science

From 2021 - 2025

Personal Projects

Website MCEXpress: Developed a fully functional website for a moving company, using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB. Implemented key features such as a dynamic "Get Quote" system for cost estimation, a customer rating and review system, and secure user authentication. Focused on responsive design, performance optimization, and structured testing to ensure a seamless user experience across all devices.

Property Management Website: using C#, ASP.NET Core MVC, and Entity Framework Core, designed to streamline property listings, tenant management, and rental operations. The platform includes features such as property uploads with advanced search filters, tenant management tools, and role-based authentication using ASP.NET Identity.
